PROFILE

A web developer with 10+ years of experience; a team player who engages cross-functional teams, drives results, and produces well-crafted web and mobile experiences. Looking to contribute my skills and entrepreneurial experience towards a fast-paced, innovative, creative organization.

CAREER EXPERIENCE

Sr. Drupal Developer: US Department of State, ECA (Contract) **Sept 2016 - Present**

- Maintained, modernized, and de-coupled a large-scale Drupal 7 multisite that collectively saw an average of 340,000 active users a month by updating legacy code and re-building custom modules
- Created a JavaScript game for a global education social media campaign
- Developed a headless Drupal 8 publication system to help manage the creation of interactive campaign websites
- Created a social media chatbot module that answered questions about Exchange Programs, leveraging a series of custom modules, Services, and the Google Dialogflow API
- Improved site security by implementing a two-step Single-Sign-On login for administrator accounts via a custom module leveraging Google Single Sign-On, Rules, and Services
- Decreased deployment times by implementing an automatic deployment process using Git, Ansible, and Jenkins
- Enhanced user data safety by working with DevOps to create an Ansible PII data scrub whenever production data was being loaded onto a test or development environment

Wordpress Developer: David for Delegate (Contract) **March 2017**

- Designed and developed a Wordpress site including custom templates and plugins using PHP, SCSS, JavaScript

Drupal Developer: IBM / HHS - SAMSHA (Contract) **April 2016 - Sept 2016**

- Front-end team lead, oversaw the development of a mobile-first Drupal template, leveraging SCSS, Omega 4, and other front-end libraries
- Developed a series of custom Drupal modules that were incorporated into the SAMHSA Knowledge Network web application

Chief Technology Officer: Openreporter@, Inc. **Jan 2014 - Dec 2015**

- Developed a map-based newswire using Drupal, PHP, HTML, CSS, and JavaScript to help reporters connect with sources from around the world using third-party APIs, RSS, JSON, and XML feeds from private and public data sets
- Increased web traffic and social media following via a custom automated marketing engine built with Drupal and PHP
- Created an IOS app framework for web developers to easily deploy IOS apps based on a headless CMS system
- Developed an application deployment script using Puppet and Vagrant that created identical development, staging, and production environments

Web Developer: Freelance/Self **Jan 2006 - Present**

- Designed and developed websites for clients using PHP, HTML, CSS, JavaScript, WordPress, and Drupal
- Created TypeTote, a lightweight flat file CMS built using PHP, JavaScript, and CSS/SCSS
- Developed IncludeJs, a JavaScript library to easily load modular web code into any JavaScript application
- Built Scaffold, a framework for responsive grid and scalable typography using SCSS/CSS
- Developed Observatory, a geo-proximity search tool that displayed real-time geo-tagged data from Twitter and Google News using JavaScript, PHP, and various APIs
- Created a twitter chatbot using PHP, JavaScript, and the Google Dialogflow API

Product Manager: [ReelGenie, LLC](#)

Sept 2013 - Dec 2013

- Overhauled development by implementing an agile methodology, reducing development time from six weeks to two
- Created an automation script that would move support requests from the customer support system to the main development project management tool

Business Relationships Manager: [Apple, Inc](#)

Aug 2010 - Sept 2013

- Broke records for lead generation and re-established business acumen amongst employees
- Streamlined internal operations and exceeded customer satisfaction and retention by 70%
